Summary

Software engineer with 4 years of experience across warehouse systems, analytics, workflow tooling, QA automation, and independent product builds. Strongest in environments where software supports real operations, from regulated workflows and data pipelines to internal tools and modernization work. Brings a mix of systems thinking, product instinct, and growing experience leading and mentoring newer teammates.

Work Experience

Publix Super Markets2022 – Present

Software Engineer

- Build and support warehouse, pharmacy, analytics, and internal tooling systems across a large operational footprint.
- Help modernize legacy warehouse inventory jobs and integrations through smaller specs, safer rebuilds, and stronger regression discipline.
- Built governed data lake and reporting workflows for DSCSA pharmacy tracing across 12 warehouse locations using Snowflake, Databricks, and Power BI semantic models.
- Delivered Power Apps, Power Automate, and API-based workflow tooling that removed significant manual reconciliation work and improved file-exception handling.
- Led QA automation for warehouse-control modernization using Playwright, CI/CD pipelines, and Azure Key Vault.
- Served as lead support engineer for controlled-substances software and file balance monitoring across 40+ warehouses.
- Mentored newer teammates on testing discipline, documentation, CI/CD habits, and practical AI-assisted delivery patterns.

Florida State University2019 – 2022

S.T.E.M. Course Instructor

- Taught STEM-focused coursework and supported students through technical concepts, structured problem solving, and hands-on learning.
- Built communication habits that still carry into engineering work: clearer documentation, patient collaboration, and practical mentorship.

Skills

Languages: C#, TypeScript, Python, SQL, Swift
Frameworks & Platforms: React, Next.js, SwiftUI, SpriteKit, FastAPI, Power Apps, Power Automate
Cloud, Data & DevOps: Azure, CI/CD, Azure Key Vault, Snowflake, Databricks, Power BI
Testing & Automation: Playwright, Regression Testing, QA Automation, Workflow Tooling, API Integrations

Projects

Rally2026 – Present

Tennis lifestyle app

- Built as a local-first iOS product using SwiftUI, SpriteKit, SwiftData, and AVAudioEngine.
- Designed around a repeatable engagement loop spanning play, logs, journaling, avatar customization, and shop surfaces.

GATEKPT2025 – Present

AI-assisted production workspace

- Focused on reducing context loss across long creative workflows through persistent project memory and threaded workspaces.

Green Machine2024 – Present

Research and monitoring platform

- Combines dashboards, monitoring, alerts, and execution-prep tooling in one system.

Education

Florida State University2019 – 2022

Bachelor of Science in Computer Science & Business
