PROFESSIONAL SUMMARY

Software engineer with 4 years of experience in QA automation, systems validation, CI/CD, workflow tooling, and supportable software delivery. Strongest in modernization contexts where tests, documentation, and release discipline make production systems safer to change. Brings practical experience with Playwright, regression testing, API-driven workflows, and cross-functional delivery.

EXPERIENCE

Publix Super Markets

Software Engineer | 2022 - Present

- Led QA automation efforts for modernization work on a C#-heavy enterprise stack, including Playwright coverage, CI/CD execution, and secure test configuration.
- Built repeatable validation workflows and regression checks to improve release confidence for important software changes.
- Helped translate legacy jobs and integrations into smaller specs, safer implementation slices, and clearer acceptance criteria.
- Contributed to data, reporting, and workflow-tooling projects using Snowflake, Databricks, Power BI, Power Platform, and APIs.
- Documented workflows and acceptance criteria with attention to accuracy, auditability, and release confidence.
- Help teammates improve testing discipline, documentation, CI/CD habits, and practical AI-assisted delivery patterns.

Florida State University

S.T.E.M. Course Instructor | 2019 - 2022

- Taught STEM-focused coursework and supported students through technical concepts, structured problem solving, and hands-on learning.
- Developed a practical mentorship style grounded in clarity, patience, and repeatable learning systems.

PROJECTS

Rally | 2025 - Present

Premium tennis lifestyle product pairing a fast daily rally engine with training, journaling, global court discovery, and real-world fashion and gear.

- Built as a local-first iOS product using SwiftUI, SpriteKit, SwiftData, and AVAudioEngine.
- Designed product surfaces around daily interaction, local persistence, and mobile-first user flow.

GateKPT MusicOS | 2025 - Present

C#/NET Avalonia creative operating system for live-loop artists, combining RC-505 performance planning, local project memory, lyric/caption workflows, stem capture, hardware routing, and audio-reactive visual artwork.

- Structured around local project files, section-based planning, and hardware-aware creative workflows.

Green Machine Quant OS | Fall 2021 - Present

Python/FastAPI quantitative research and paper-execution platform connecting OAuth-secured Schwab data with local backtesting, risk analytics, paper trading, and AI-assisted research review.

- Uses shared execution and risk abstractions for reproducible backtesting, paper execution, and safer research review.

SKILLS

Testing and Automation: Playwright, regression testing, test planning, CI/CD validation, QA automation, acceptance criteria

Languages: C#, TypeScript, Python, SQL, Swift

Frameworks and Platforms: React, Next.js, FastAPI, SwiftUI, SpriteKit, Avalonia, Power Platform

Data and Delivery: Azure, CI/CD, Snowflake, Databricks, Power BI, API integrations, workflow tooling

EDUCATION

Florida State University

Bachelor of Science in Computer Science & Business | 2019 - 2022
