PROFESSIONAL SUMMARY

Software engineer with 4 years of experience across systems, analytics, workflow tooling, QA automation, and independent product builds. Strongest where software supports real operational work: internal tools, data and reporting workflows, modernization, and systems that need reliability, traceability, and supportability. Brings systems thinking, product instinct, and practical delivery habits across engineering, testing, and documentation.

EXPERIENCE

Publix Super Markets

Software Engineer | 2022 - Present

- Contribute to enterprise software work across QA automation, analytics, internal workflow tooling, and modernization.
- Led QA automation efforts for modernization work on a C#-heavy stack, including Playwright coverage, CI/CD execution, and secure test configuration.
- Contributed to data, reporting, and workflow-tooling projects using Snowflake, Databricks, Power BI, Power Platform, and API integrations.
- Document workflows and acceptance criteria with attention to accuracy, auditability, and release confidence.
- Help teammates improve testing discipline, documentation, CI/CD habits, and practical AI-assisted delivery patterns.

Florida State University

S.T.E.M. Course Instructor | 2019 - 2022

- Taught STEM-focused coursework and supported students through technical concepts, structured problem solving, and hands-on learning.
- Built communication habits that still carry into engineering work: clearer documentation, patient collaboration, and practical mentorship.

PROJECTS

Rally | 2025 - Present

Premium tennis lifestyle product pairing a fast daily rally engine with training, journaling, global court discovery, and real-world fashion and gear.

- Built as a local-first iOS product using SwiftUI, SpriteKit, SwiftData, and AVAudioEngine.
- Designed around a repeatable daily rally engine supported by training, journal, court discovery, and style/gear surfaces.

GateKPT MusicOS | 2025 - Present

C#/NET Avalonia creative operating system for live-loop artists, combining RC-505 performance planning, local project memory, lyric/caption workflows, stem capture, hardware routing, and audio-reactive visual artwork.

- Designed as an artist cockpit that sits above the creative rig without replacing musicianship, hardware, or DAW workflows.

Green Machine Quant OS | Fall 2021 - Present

Python/FastAPI quantitative research and paper-execution platform connecting OAuth-secured Schwab data with local backtesting, risk analytics, paper trading, and AI-assisted research review.

- Designed with live broker execution isolated behind explicit safety gates while research and paper execution share common abstractions.

SKILLS

Languages: C#, TypeScript, Python, SQL, Swift

Frameworks and Platforms: React, Next.js, SwiftUI, SpriteKit, FastAPI, Avalonia, Power Platform

Cloud, Data, and Delivery: Azure, CI/CD, Snowflake, Databricks, Power BI, SQLite

Testing and Automation: Playwright, regression testing, QA automation, workflow tooling, API integrations

EDUCATION

Florida State University

Bachelor of Science in Computer Science & Business | 2019 - 2022
