PROFESSIONAL SUMMARY

Software engineer with 4 years of experience across enterprise modernization, QA automation, internal workflow tooling, data/reporting workflows, and independent product builds. Strong fit for AI-enabled healthcare and pharmacy infrastructure: combines software engineering discipline, pharmacy operations context, AI-native development habits, and a builder mindset across C#, TypeScript, Python, SQL, Azure-based delivery workflows, Playwright, and API integrations.

TECHNICAL SKILLS

Languages: C#, TypeScript, Python, SQL, Swift

Backend / Product: APIs, FastAPI, .NET/Avalonia, React, Next.js, Power Platform, internal workflow tooling

Cloud / Data / Delivery: Azure, CI/CD, Snowflake, Databricks, Power BI, SQLite, secure configuration

Testing / Automation: Playwright, regression testing, QA automation, test planning, acceptance criteria

AI / Domain: AI-assisted development with ChatGPT/Codex/Cursor/Claude, healthcare/pharmacy workflow context

EXPERIENCE

Publix Super Markets | 2022 - Present

Software Engineer

- Led QA automation efforts for modernization work on a C#-heavy enterprise stack, building Playwright regression coverage and helping move validation into repeatable CI/CD workflows.
- Improved release confidence by translating legacy behavior, edge cases, and integration expectations into clearer test coverage, acceptance criteria, and implementation notes.
- Contributed to data, reporting, and workflow-tooling projects using Snowflake, Databricks, Power BI, Power Platform, and API integrations.
- Worked with secure test configuration and Azure-based delivery patterns, including pipeline execution and secret/configuration handling.
- Built and supported internal workflow tooling that reduced manual reconciliation, file-exception handling, and repetitive follow-up work.
- Documented workflows, test plans, system behavior, and handoff notes so teammates could understand changes, reproduce issues, and support releases more confidently.
- Use AI-assisted development tools to accelerate research, implementation planning, test design, documentation, and debugging while keeping engineering review discipline.

Florida State University | 2019 - 2022

S.T.E.M. Course Instructor

- Taught STEM-focused coursework and supported students through technical concepts, structured problem solving, and hands-on learning.
- Built communication habits that carry into engineering work: clear documentation, patient collaboration, and practical mentorship.

Pharmacy Operations Experience

Prior experience

- Bring firsthand context from pharmacy operations and customer/patient-facing workflows, including the importance of accuracy, coordination, and reducing friction in service delivery.

SELECTED BUILDS

GateKPT MusicOS | 2025 - Present

C#/ .NET Avalonia creative operating system for live-loop artists, combining performance planning, local project memory, lyric/caption workflows, hardware routing, and audio-reactive visual artwork.

Green Machine Quant OS | 2021 - Present

Python/FastAPI research and paper-execution platform connecting OAuth-secured broker data with local backtesting, risk analytics, paper trading, and AI-assisted research review.

Rally | 2025 - Present

Local-first iOS product using SwiftUI, SpriteKit, SwiftData, and AVAudioEngine for tennis training, journaling, court discovery, and daily engagement loops.

EDUCATION

Florida State University - Bachelor of Science in Computer Science & Business | 2019 - 2022
